

# Love Joes Ltd

## ABOUT THE COMPANY

Love Joes Ltd provides bespoke coated chicken products to both commercial and public sector customers. They purchase chicken, and butcher, season, and package on site.

## HOW WERE RISING ENERGY COSTS IMPACTING THE BUSINESS?

Love Joes Ltd utilises a large refrigeration system across their operation. These energy intensive plant use a lot of energy as they are on 24/7, 365 days a year, and therefore contribute to the majority of all energy consumption on site. Rising electricity costs have made the use of this crucial aspect of their operation very expensive.

## WHY DID THEY WANT TO PARTICIPATE IN THE PROGRAMME?

Love Joes Ltd joined the BEAS Energy Intensive programme as they were seeking professional advice on reducing energy consumption and costs as well as developing a better understanding of the company's Scope 1 and Scope 2 emissions, and to develop their low and net-zero carbon strategies. Love Joes Ltd supplies several governmental institutions and needed to understand where they were on their decarbonisation journey. Understanding the jargon of sustainability and helping reduce the costs of running their business were also additional factors.

## WHAT IS THE POSSIBLE IMPACT OF IMPLEMENTING THE RECOMMENDATIONS FROM THE ASSESSMENT?

There is great scope to reduce Carbon Emissions of the company, as well as reducing operating costs. Implementation of the recommended measures should result in reduction of 373,444 kWh of energy and £105,872 of annual energy costs.

"We are grateful that a part of this programme is the accessibility and the quality of technical support provided by the partners delivering the programme. Professional advice and support from Pro Enviro have meant reinforcing our confidence in our sustainability journey"

Yianno Koumi, Head of  
Business Information.
